Premium+[®] XL and XXL

Automatic Roll-away nests for maximum egg production

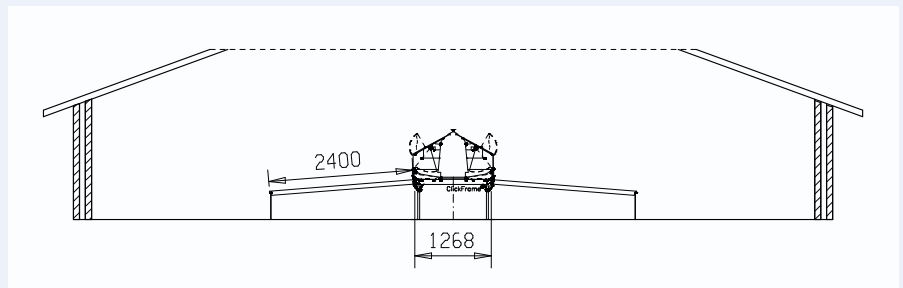

Benefits

The serie Premium+[®], XL and XXL laying nests offer the following advantages:

- ✓ Maximum production of consumption and hatching eggs
- ✓ Optimum density per nest unit
- ✓ Clean eggs because of a nest mat with an open structure
- ✓ Patented expel system
- ✓ Fast assembly because of ClickFrame[®]
- ✓ Fabricated from natural material (plywood) and plastic partition walls

About the laying nests

A Premium+[®], XL or XXL-laying nest provides sufficient room for the hens to lay first quality eggs. Even with high hen density and high temperatures, the nest environment remains optimal. The open nest mat structure in combination with the expel system ensures clean eggs. The eggs roll clean out of the laying nest onto the egg belt. The single sided wall construction ensures that lice and mites will not have a place to develop.

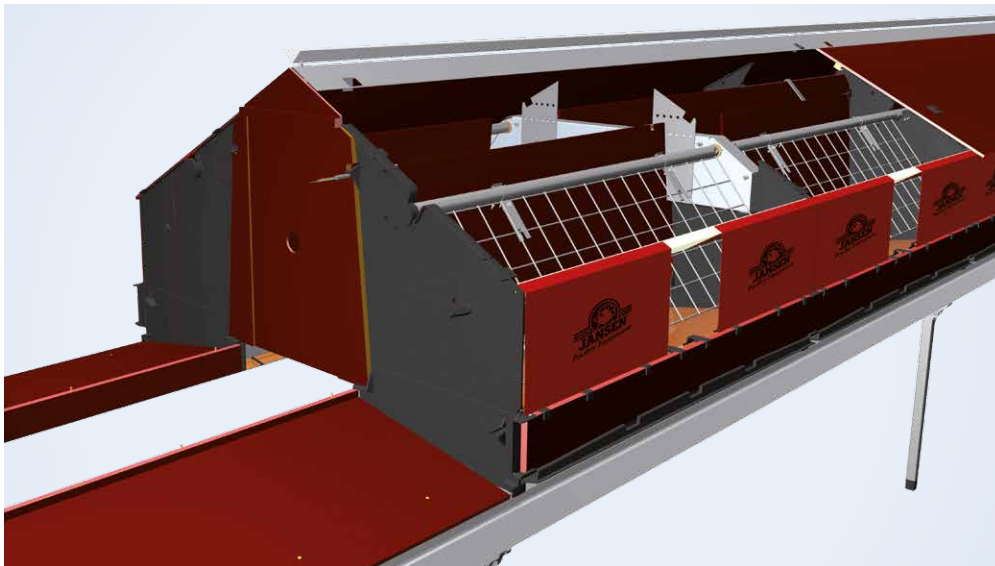

25 years experience with automatic roll-away nests

Albert Jansen, owner and founder of JPE and the innovator of the community rollaway nest, developed the first automatic community roll-away nest in 1986. Innovation, experience and product optimization make Jansen Poultry Equipment your partner in Poultry Equipment.

Premium+[®] XL and XXL

Automatic Roll-away nests
for maximum egg production

Lay-out

Premium+[®], XL or XXL-laying nest options:

- Single row nests with a belt width of 250 mm (10")
